EXPERIENCE
REQUIRED**

**AutoDeck™
INSTANT GARAGE FLOORS**

Create your own spectacular showroom in your garage in a matter of hours.

The most practical and easy-to-install modular garage and industrial floor anywhere. Whether you are looking to renew your garage, add color to a showroom or need a slip-resistant floor anywhere, we've got the flooring solution for you. With over 40 different portable tiles, we've got something for every need or application you may have.

AutoDeck is a one-square foot modular flooring tile that easily allows you to create a raised, dry, slip-resistant surface that never has to be refinished. It is UV-stabilized so the colors won't ever fade. The tiles are resistant to chemicals such as oil, grease and brake fluid. AutoDeck helps you keep you and your car, clean and dry. Choose from our wide range of colors to create the look you want.

AutoDeck connects easily using Signature's simple pressure tab-and-loop connection system. Our connection system contains 7 connection points on each side (other tiles have 4, making it more difficult to connect) - allowing for easy connectivity and a super secure fit. Tiles will not separate under pressure once they are connected.

Anyone can install AutoDeck. Using our simple instructions, AutoDeck can be installed by anyone regardless of experience or skill level. No special tools are required. Make it a fun family project or invite a couple of friends over. A typical 2-bay garage floor (20'5" w x 20'5" L) can be installed in 2 hours with 2 people.

Complete the floor with our edging pieces to close off connection points and eliminate any tripping hazards. The edging also provides a slightly sloped transition to the floor making it easy to drive onto.

With 4 types of AutoDeck tiles to choose from, you can mix and match tile styles to suit your application and needs.

4 STYLES TO CHOOSE FROM - MIX & MATCH TO CREATE A MULTI-USE FLOOR

AUTODECK 5 (AD5) - DIAMOND-PLATE TILE

The Diamond Plate Tile is our most popular garage floor tile. The rugged look and texture allows you to create a spectacular-looking floor worthy of a NASCAR racing pit. Create your own showroom in your garage quickly, easily and economically. Raised pattern prevents slipping and provides traction for vehicles.

AUTODECK 1 (AD1) - OPEN TILE

The Open Tile incorporates hundreds of triangular drainage holes. This allows liquid to flow underneath and air to circulate. We will do our part in keeping you safe and dry, the rest is up to you. The combination of our unbeatable structure and high-impact polypropylene, AutoDeck can hold 20,000 lbs per sq/ft on a solid sub-surface. This makes AutoDeck the perfect solution for your garage or any wet area.

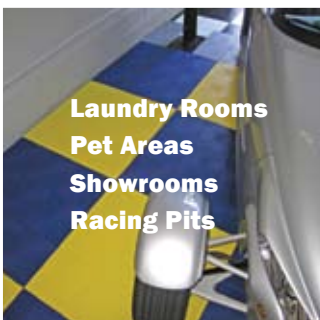

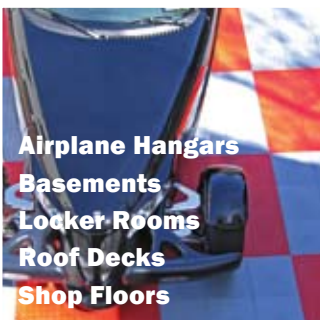

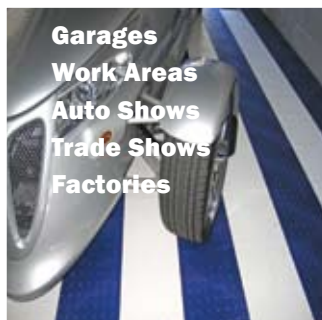

AUTODECK 2 (AD2) - SMOOTH TILE

The Smooth Tile is a slip-resistant solid tile. No need to spend tons of money repairing your floor with poured concrete for it to just crack and stain. Our tiles will never warp or rot, so the floor will look great years after you install it. Mix and match your colors to create the design you want. Whatever design you choose, AD2 will create a uniform, smooth surface that will last. Add a rubber underlayment for added shock and sound absorption. AutoDeck is the perfect floor at a minimal cost.

AUTODECK 4 (AD4) - LAMINATE VINYL TILE

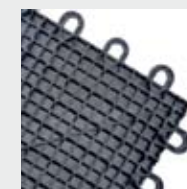

The Simulated Wood Vinyl Tile has the look and feel of real wood without the cost and maintenance. It is lightweight and simple to clean. Choose AutoDeck 4 tiles to create add warmth and elegance to a garage, auto show, trade show or retail showroom. AD4 is available in four colors: dark wood, light wood, black and white. (Please note: AD4 cannot be mixed with any other style.)
